SOFTWARE ENGINEER

Brandon Temple

Software engineer focused on automation and data systems, building desktop and web tools with C#, .NET, Python, SQL, JavaScript, and APIs. Experience designing reporting workflows, file-processing utilities, metadata tools, and API-backed internal systems for operational teams.

Starkville, MS bt1142@msstate.edu brandontemple.com github.com/bt1142msstate

PROFESSIONAL EXPERIENCE

Software Engineer (Data Systems) / Technology Coordinator

MSU Libraries, Mississippi State University | Starkville, MS | Aug 2024 - Present

- Built automation and reporting tools in C#, Python, Perl, SQL, JavaScript, and HTML to streamline file processing, metadata extraction, data export, and staff workflows for MSU Libraries.
- Developed Query, a browser-based reporting system with configurable filters, API-backed payloads, report history, and Excel export for live library item data.
- Created MetaTable, a WPF metadata scanner for large directory trees with real-time progress tracking and structured Excel exports.
- Integrated SirsiDynix APIs, SQL-backed data sources, and Excel libraries to support internal reporting and operational data workflows.
- Applied AI-assisted engineering with C# and C++ systems fundamentals, data structures, debugging, and code review to validate generated code for correctness, performance, and maintainability.

PROJECTS

MetaTable

WPF File Metadata Scanner | C#, .NET 9, EPPlus

WPF scanner for large directory trees; extracts file metadata, tracks progress, and exports structured Excel reports for MSU Libraries.

github.com/bt1142msstate/MetaTable

HTMLConverter

WinUI 3 Batch PDF Converter | .NET 8, WebView2

WinUI 3 app for batch converting HTML files, folders, and ZIP archives to PDF with drag-and-drop intake, scaling controls, and output archiving.

github.com/bt1142msstate/HTMLConverter

Query

Browser-Based Report Builder | JavaScript, HTML, CSS, ExcelJS

Browser-based MSU Libraries reporting tool with configurable filters, structured API payloads, report history, and Excel export.

github.com/bt1142msstate/Query

Ady Resolver

Mississippi Address Resolution Toolkit | Python, Machine Learning

Python address-resolution toolkit and local browser app using cached public data, staged matching, typo-heavy evaluation data, and lightweight ML.

github.com/bt1142msstate/Ady-Resolver

connect4-ai

Browser-Based Game AI Demo | JavaScript, Minimax, Alpha-Beta Pruning

Playable browser game AI with minimax, alpha-beta pruning, replay tooling, experiment modes, and headless validation.

github.com/bt1142msstate/connect4-ai

TECHNICAL SKILLS

Languages	C#, Python, SQL, JavaScript, TypeScript, HTML, C++
Frameworks	.NET 8/9, ASP.NET Core, WPF, WinUI 3
Data & APIs	SQL Server, PostgreSQL, EF Core, REST APIs, SirsiDynix APIs
Libraries	WebView2, EPPlus, ExcelJS
Tools	Git, Visual Studio, VS Code, Postman, MSTest
Methods	Data Structures, Algorithms, TDD, Agile, AI-First Engineering, Code Review, Automation, Machine Learning

EDUCATION

Master of Science in Software Engineering
Mississippi State University | May 2027

Starkville, MS | GPA: 4.0/4.0

Bachelor of Science in Computer Science, Cum Laude
Mississippi State University | May 2024

Starkville, MS | GPA: 3.68/4.0
Honors: Phi Theta Kappa, Gamma Beta Phi

Associate of Arts in Computer Science
East Central Community College | May 2021

Decatur, MS | GPA: 3.85/4.0
Honors: Phi Theta Kappa, Gamma Beta Phi
President's List: Fall 2019, Spring 2020
Dean's List: Fall 2020
C++ Programming Award
Outstanding ECCC CS Student Award, awarded by Mississippi State University (custom cowbell)

ADDITIONAL EXPERIENCE

Community Assistant
College View, Mississippi State University | 2022 - 2024

- Supported student residents through communication, policy enforcement, community operations, and incident response.
- Coordinated resident support workflows while balancing graduate-level software engineering coursework.

STEM Leader & Math Tutor
Afternoon Adventure Learning Center | 2018 - 2021

- Tutored students in math, science, and technology.
- Prepared students for exams and improved study strategies.
- Designed engaging STEM activities with staff.

Computer Science Lab Monitor
East Central Community College | 2019 - 2020

- Maintained and troubleshot lab computers and systems.
- Assisted students with technical issues and software use.
- Supported problem solving and computer literacy.
